APRIL 22nd WEBINAR REMINDER

April is WV ASHRAE's Month of Learning Series

ONLY 4 Days until our next Webinar!

Register for Free NOW!

April 22, 2021 - 12:00 pm - 1:15 pm EDT
How and Why of Solar in West Virginia
Presenter – Charles Pickering, PE, PMP, PhD, LEED AP, Pickering Energy Solutions

We searched far and wide to find the engineer with the most solar jobs in WV. Our presenter is that person. "Chip" has 3 offices in WV and one in Ohio. Hear first-hand why WV folks (i.e.: owners, your customers) are doing residential and commercial solar, how to do it and the pitfalls one might run into. Chip Pickering has designed and installed many solar systems in WV and South Africa.

**Registration details:**
We ask that all attendees pre-register for the event through the following link: https://attendee.gotowebinar.com/register/8541068310668745230

After registering, you will receive a confirmation email containing information about joining the webinar.
Registration is OPEN!
April 29, 2021 - 12:00 pm - 1:15 pm EDT
Electrification of Heating and Rapid Decarbonization

(Joint meeting with Louisville and Bluegrass Chapters)

Presenter - Stet Sanborn, Principal and Engineering Discipline Leader, Smith Group’s San Francisco office

This is a hot topic. With the US’s plan set to rejoin the Paris Climate Accord, our country's governance at all levels will need to accelerate decarbonization strategies to meet reduction goals of the Accord. Our presenter will provide an overview of strategies adopted across North America and challenges we will face including those unique to the WV/KY area. Stet will provide a background on the development of national decarbonization policies and the transition to electrified buildings. Hear about emerging technologies, like CO2 heat pumps, that are helping drive the rapid electrification of the built environment, including complex buildings like research labs and carbon-intensive applications like space heating and domestic hot water production. He will also explain load-shifting strategies needed to enable a resilient, carbon-free utility grid. We heard Stet speak last month at the ASHRAE Illinois Chapter meeting and recruited him to speak to the WV and KY chapters.

Registration details:
We ask that all attendees pre-register for the event through the following link: https://attendee.gotowebinar.com/register/1067956057512493582
